Grant Title: NIDCD CLINICAL RESEARCH CENTER GRANT (P50)

Funding Opportunity Number: PAR-10-047. CFDA Number(s): 93.173.

Agency/Department: Department of Health and Human Services, National Institute on Deafness and Other Communication Disorders (NIDCD), National Institute on Deafness and Other Communication Disorders (NIDCD).

Area of Research: Clinical research in human communication disorders.

Amount: Budgets for new P50 applications are limited to $1,500,000/year direct cost (DC), including consortium direct costs but excluding facilities and administrative consortium costs.

Length of Support: The total project period may not exceed 5 years.

Eligible Applicants: Public and State controlled institutions of higher education. See the full announcement for a complete list of eligible applicants.

Summary: The National Institute on Deafness and Other Communication Disorders (NIDCD) invites applications for Clinical Research Center Grants designed to advance the diagnosis, prevention, treatment, and amelioration of human communication disorders. The NIDCD believes that most research within its mission areas can be best accomplished via the investigator-initiated individual research grant (R01, R21, R03, R15) and the research core center grant (P30) mechanisms. There are special circumstances in clinical research however, that warrant use of the P50 mechanism to support clinical research. For this announcement, Clinical Research is defined as research involving individuals with communication disorders or data/tissues from individuals with a communication disorder. Examples of such research include but are not limited to, studies of the prevention, pathogenesis, pathophysiology, diagnosis, treatment, management or epidemiology of a disease or disorder of hearing, balance, smell, taste, voice, speech, or language.
