Grant Title: 2010 TECH IN THE WORKS COMPETITION

Funding Opportunity Number: N/A

Agency/Department: National Center for Technology Innovation.

Area of Research: To fund quick turnaround collaborative research that informs the development of assistive and learning technologies that can improve educational results for all students, particularly those with disabilities.

Amount: Up to $20,000. Number Of Awards: 4. The collaboration team must secure matching funds of at least $20,000 from at least one of the parties involved in the study. The matching funds may be given to the project in the form of in-kind materials, equipment, or staff. We encourage creative arrangements. The NCTI award and matching funds may be used to support an expansion of an already existing research project. However, these funds cannot be used to purchase hardware or software. No more than five percent of the award may be budgeted to cover administrative and indirect costs.

Length of Support: Not listed.

Eligible Applicants: Collaboration team. Applicants must propose a collaborative study involving at least one researcher and one vendor to examine the effectiveness of a technology product in improving educational results for all students, particularly those with disabilities. NCTI is committed to fostering new talent in the field of educational and assistive technology. We strongly encourage graduate student-vendor teams to apply. Technology. The technology product should be innovative, beneficial for students with disabilities, and have wide market appeal.

Summary: To fund quick turnaround collaborative research that informs the development of assistive and learning technologies that can improve educational results for all students, particularly those with disabilities.
