Grant Title: ACTIVE LIVING RESEARCH: BUILDING EVIDENCE TO PREVENT CHILDHOOD OBESITY

Funding Opportunity Number: N/A

Area of Research: Supports research to inform policy and environmental strategies for increasing physical activity among children and adolescents.

Release and Expiration: N/A

Application Deadline: Grants are awarded on a rolling basis. Letters of intent may be submitted at any time until July 1, 2011.

Amount: The maximum award for a single grant is $150,000. A total of up to 10 rapid-response grants will be awarded through December 1, 2011.

Length of Support: Up to 18 months.

Eligible Applicants: Preference will be given to applicants who are either public entities or nonprofit organizations that are tax-exempt under Section 501(c)(3) of the Internal Revenue Code. Applicant organizations must be based in the United States or its territories. The focus of this program is the United States; studies in other countries will be considered only to the extent that they may directly inform U.S. policy.

Summary: Active Living Research is a national program of the Robert Wood Johnson Foundation (RWJF) that supports research to inform policy and environmental strategies for increasing physical activity among children and adolescents, decreasing their sedentary behaviors and preventing obesity. The program places special emphasis on reaching children and youths ages 3 to 18 who are at highest risk for obesity: Black, Latino, American Indian and Asian/Pacific Islander children, as well as children who live in under-resourced and lower-income communities. This call for proposals will support opportunistic, time-sensitive studies on emerging or anticipated changes in physical activity-related policies or environments. Rapid-response grants are expected to accelerate progress toward policy and environmental strategies to prevent and reduce childhood obesity. For maximum impact, studies should be completed in as short a time frame as realistically possible, and results disseminated using methods designed to reach local, state or national decision-makers in time to help inform key policy decisions. Detailed results of these studies, including methodologies and data analyses, along with the outcome of the efforts to reach policy audiences, also should be subsequently reported in peer-reviewed publications.
