**Grant Title:** RESEARCH GRANTS FOR PREVENTING VIOLENCE AND VIOLENCE-RELATED INJURY

**Funding Opportunity Number:** RFA-CE-14-006. CFDA Number(s): 93.136.

**Agency/Department:** Centers for Disease Control and Prevention (CDC); National Center for Injury Prevention and Control (NCIPC).

**Area of Research:** Injury and violence prevention.

**Release and Expiration:** Release Date: December 13, 2013. Expiration Date: March 20, 2014.

**Application Deadline:** March 19, 2014. Letter of Intent Due Date: February 14, 2014.

**Amount:** The maximum total project funding amount is $1,050,000 (including both direct and indirect costs), with a maximum of $350,000 per award per year. Expected Number of Awards: 3.

**Length of Support:** The budget period will be for one year and the anticipated project period is up to three years.

**Eligible Applicants:** Public and State controlled institutions of higher education. See the full announcement for a complete list of eligible applicants.

**Summary:** The CDC and NCIPC are committed to achieving the health promotion and disease prevention objectives of "Healthy People 2020" and to measuring program performance as stipulated by the Government Performance and Review Act (GPRA). The proposed program of research addresses "Healthy People 2020" priority area of injury and violence prevention and is in alignment with NCIPC's performance goal to conduct a targeted program of research to prevent injuries and violence, and reduce their consequences. The purposes of the NCIPC extramural violence prevention research program are to: (a) build the scientific base for the prevention of violence by helping to expand and advance our understanding of the primary prevention of interpersonal violence; (b) encourage professionals from a wide spectrum of disciplines of epidemiology, behavioral and social sciences, medicine, biostatistics, public health, health economics, law, and criminal justice to perform research in order to prevent violence more effectively; (c) encourage investigators to propose research that involves the development and testing of primary prevention strategies, programs and policies designed to prevent interpersonal violence and reduce violence-related outcomes as well as dissemination, implementation, and translation research to enhance the adoption and maintenance of effective strategies among individuals, organizations, or communities. NCIPC is soliciting investigator-initiated research that will help expand and advance our understanding of how best to disseminate, implement, and translate evidence-based primary prevention strategies, programs, and policies designed to prevent interpersonal violence and reduce violence-related outcomes. NCIPC is also soliciting investigator-initiated research to expand our knowledge about what works to prevent violence by rigorously evaluating primary prevention strategies, programs, and policies especially in areas where we know less about what works to prevent violence such as teen dating violence, intimate partner violence, and sexual violence.
