For a complete list of eligible applicants see the full announcement.

Agency/Department: American Honda Foundation.

Summary: The American Honda Foundation will make grants in the field of youth and scientific education. They seek out those programs and organizations with a well-defined sense of purpose, demonstrated commitment to making the best use of available resources and a reputation for accomplishing their objectives. To be considered for possible funding, programs related to youth and scientific education should be: dedicated to improving the human condition of all mankind (humanistic); soundly managed and administered by enthusiastic and dedicated individuals who approach their jobs in a youthful way; look to the future or foresightful programs; innovative and creative programs that propose untried methods which ultimately may result in providing solutions to the complex cultural, educational, scientific and social concerns currently facing the American society; broad in scope, intent, impact and outreach; possess a high potential for success with a relatively low incidence of duplication of effort; operate from a position of financial soundness; in urgent need of funding from a priority basis (not necessarily financial need but the relative importance of the program or project to the public); and represent a minimal risk in terms of venture capital investment. The American Honda Foundation defines "youth" as pre-natal through 21 years of age. "Scientific education" encompasses both the physical and life sciences, mathematics and the environmental sciences.
