

Grant Title: HEALTH PROMOTION AMONG RACIAL AND ETHNIC MINORITY MALES

Grant Number: PA-07-422; PA-07-421

Area of Research: Health research intended to stimulate and expand research in the health of minority men.

Release and Expiration: July 27, 2007 release; September 9, 2010 expiration.

Application Deadline: *R01-New:* February 5, June 5, October 5 annually; *Resubmissions:* March 5, July 5, November 5 annually; *R21-New:* February 16, June 16, October 16 annually; *Resubmissions:* March 16, July 16, November 16 annually; *AIDS Related:* May 1, September 1, January 2 annually.

Amount: *R01:* Typically under \$500,000 per year in direct costs; if request equals or exceeds \$500,000, prior approval is required. *R21:* Up to \$200,000 per year; total of \$275,000.

Length of Support: *R01:* Up to 5 years; *R21:* Up to 2 years.

Eligible Applicants: Domestic and foreign institutions; For-profit and non-profit organizations; Public and private institutions; Institutions of Higher Education; Units of State and local governments; Eligible agencies of the Federal government; Faith-based and community-based organizations; Units of State and local Tribal governments.

Agency/ Department: NIH; NINR, NIDDK, NHLBI, NCI, OBSSR

Summary: This funding opportunity supports Health research intended to stimulate and expand research in the health of minority men. Specifically, this initiative is intended to: 1) enhance our understanding of the numerous factors (e.g., sociodemographic, community, societal, personal) influencing the health promoting behaviors of racial and ethnic minority males and their subpopulations across the life cycle, and 2) solicit applications focusing on the development and testing of culturally and linguistically appropriate health-promoting interventions designed to reduce health disparities among racially and ethnically diverse males and their subpopulations age 21 and older. Potential research topics include but are not limited to: Studies that test innovative interventions to reduce risk factors; multifaceted interventions designed to increase initial and repeat health screenings and risk-assessment; innovative approaches involving families, social networks, or communities; interventions to promote positive physical and mental health seeking and health maintenance behaviors; interventions that incorporate faith, cultural and family values.
