

## Overview-Home School Note Module

### **Focus of the module:**

- The focus of this module is to assist schools in improving the facilitation of family involvement with regards to student behavior in the classroom using a Home School Note. This module will provide useful information about concepts, technical information, goals, and references for schools and parents.

### **Introduction:**

- A home school note serves as a way to identify, monitor, and change a student's classroom behavior while facilitating ongoing communication between parents and schools. This module is focused on assisting schools to facilitate, design, and implement a home school note while working collaboratively with parents.

### **Learning Objectives:**

- The participant will learn about how schools will help parents select appropriate goals that are measurable, meaningful, and mutual for home and the classroom. Selecting criteria for success is presented to give ways to ensure that the program will be followed and implemented. Information will be given to assist schools in collaborating with parents about the logistics and day to day tasks of the program. Included are recommendations regarding the mutual selection of the design and reward system.

### **Suggestions & Handouts:**

- Suggestions for examining data and performance are provided as well as how to effectively use data to monitor and modify the program. Trouble shooting techniques, step-by-step implementation guidelines, sample notes, and references are presented to aid the schools facilitation of the home school note.
