

Getting Ready at Home:

The Effects of Promoting Parent Engagement in Early Childhood Programs

Susan Sheridan

Nebraska Center for Research on Children, Youth, Families
and Schools

Second Biennial CYFS Summit on Research in Early
Childhood, April 25, 2012

The *Getting Ready* Intervention

Parent-child relationship:

- Parental warmth and sensitivity
- Support for a child's emerging autonomy
- Active and meaningful participation in learning and literacy

Parent-teacher relationship:

- Creating partnerships to strengthen children's learning and development
- Collaborating across home and school to establish connections and continuity across systems and over time

Parent in relationship with child

Engaged Parent

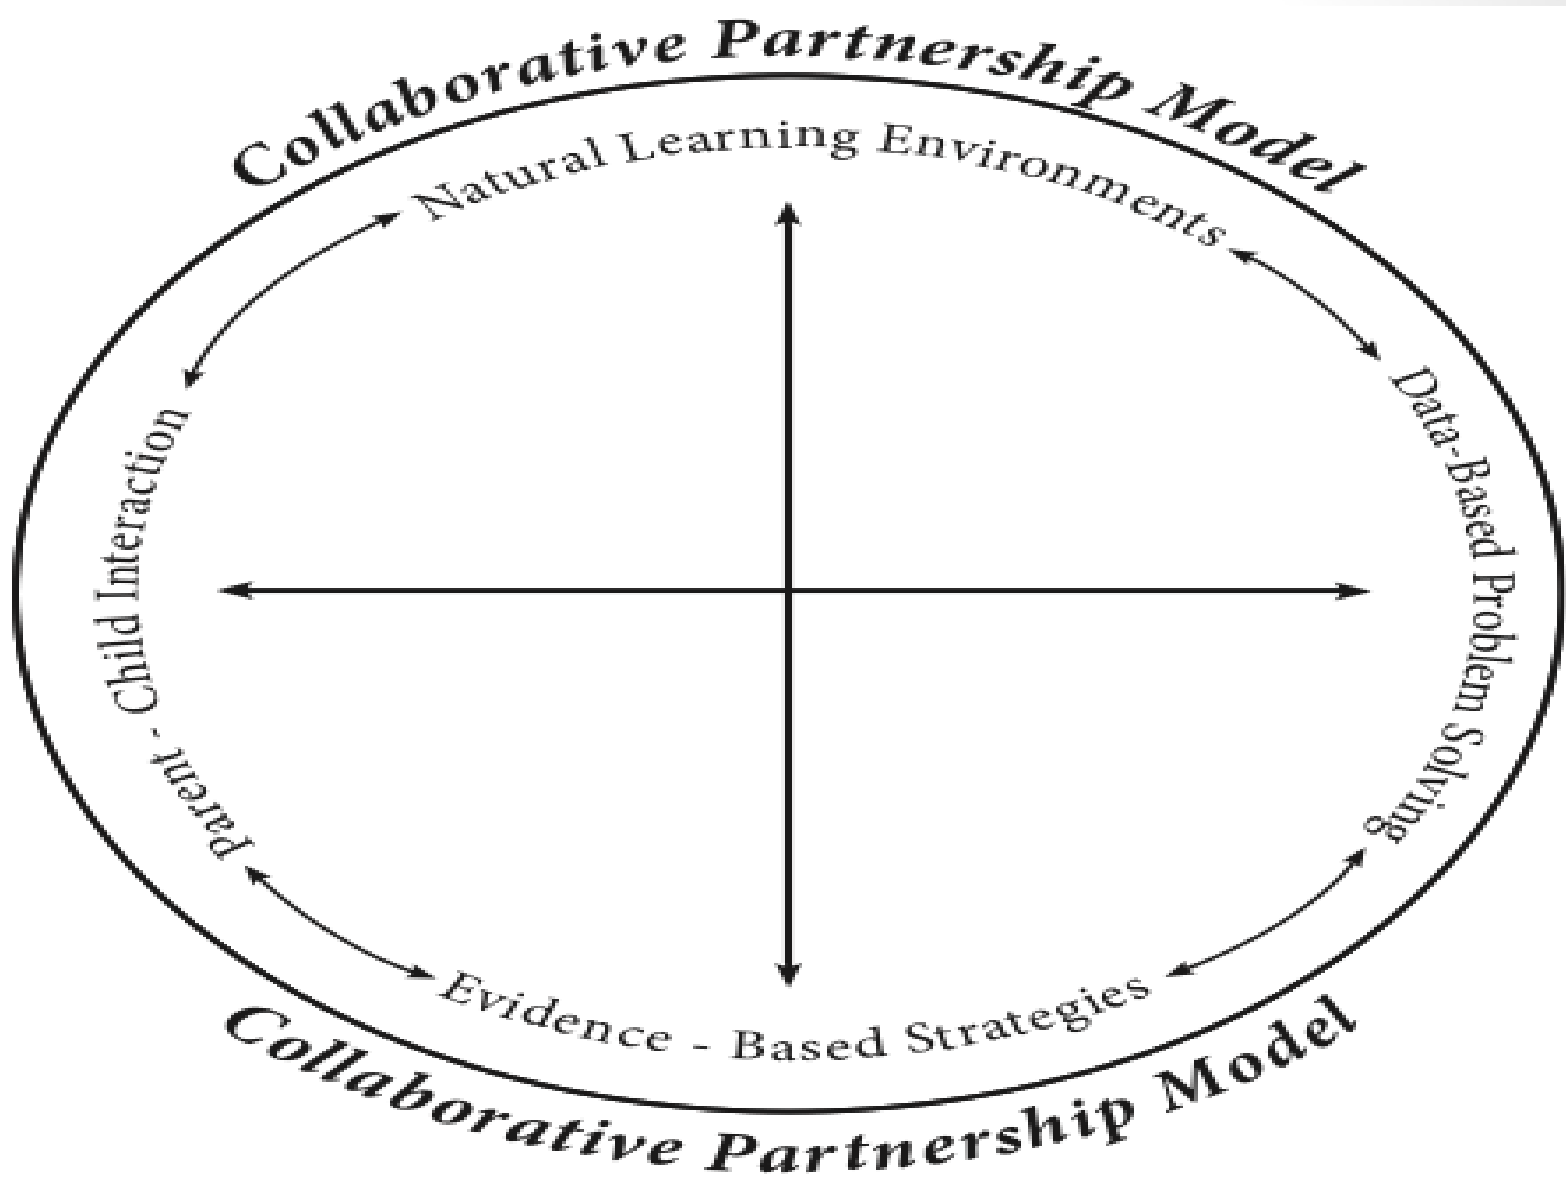

Getting Ready Intervention built on.....

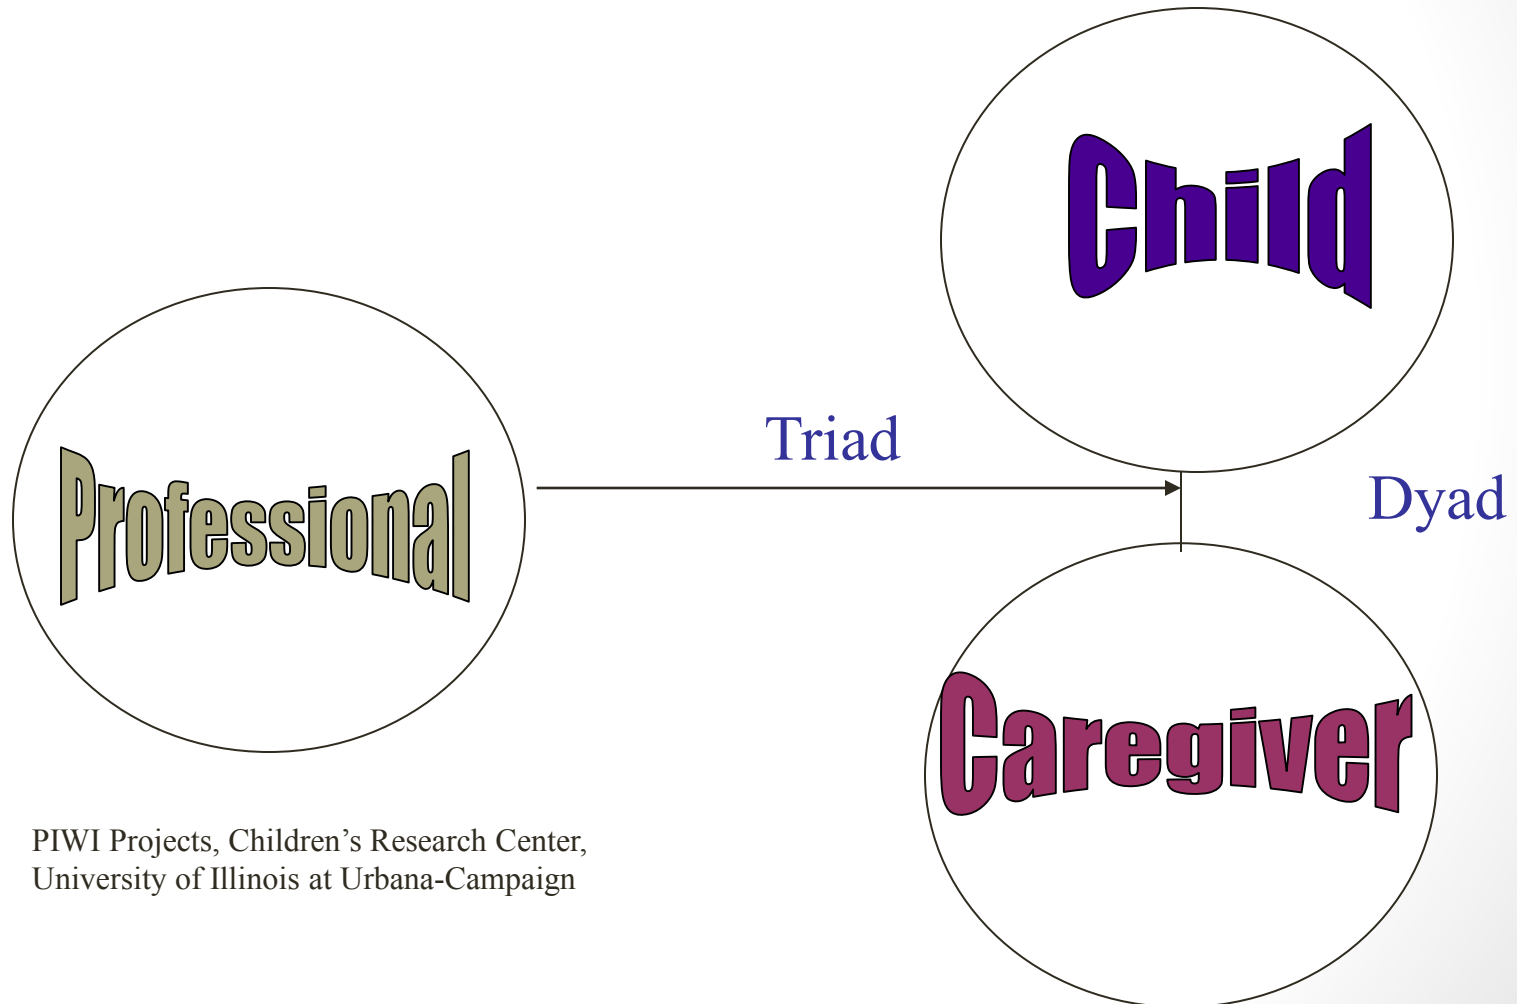

Collaborative Partnership Model

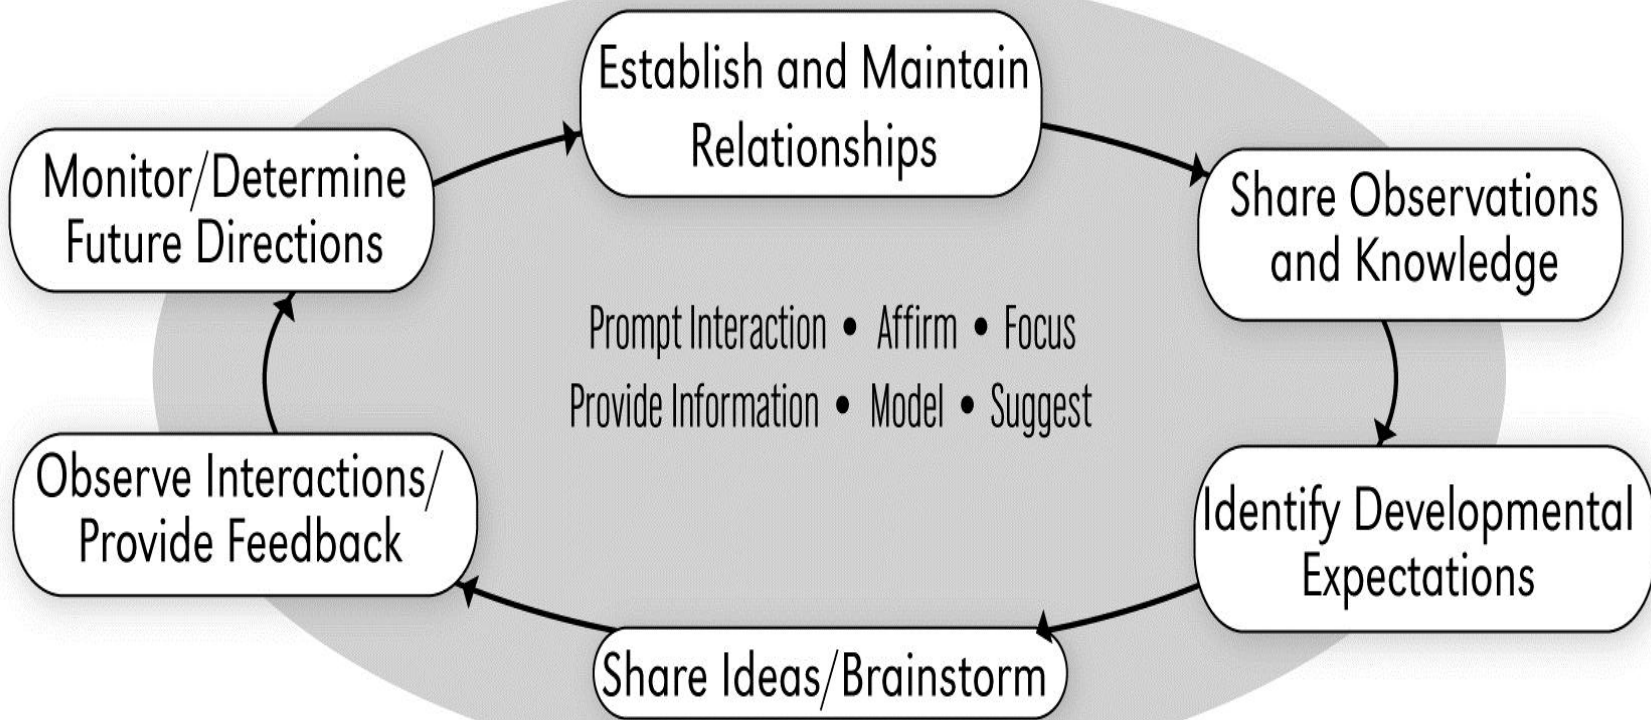

- Goal-Oriented Planning
 - to achieve desired child outcomes through parent-teacher interactions
- Triadic Strategies
 - to promote quality parent-child interactions

Focus on Dyadic interactions through Attention to Triadic Interactions

PIWI Projects, Children's Research Center,
University of Illinois at Urbana-Campaign

PROMOTES

Family and Child School Readiness

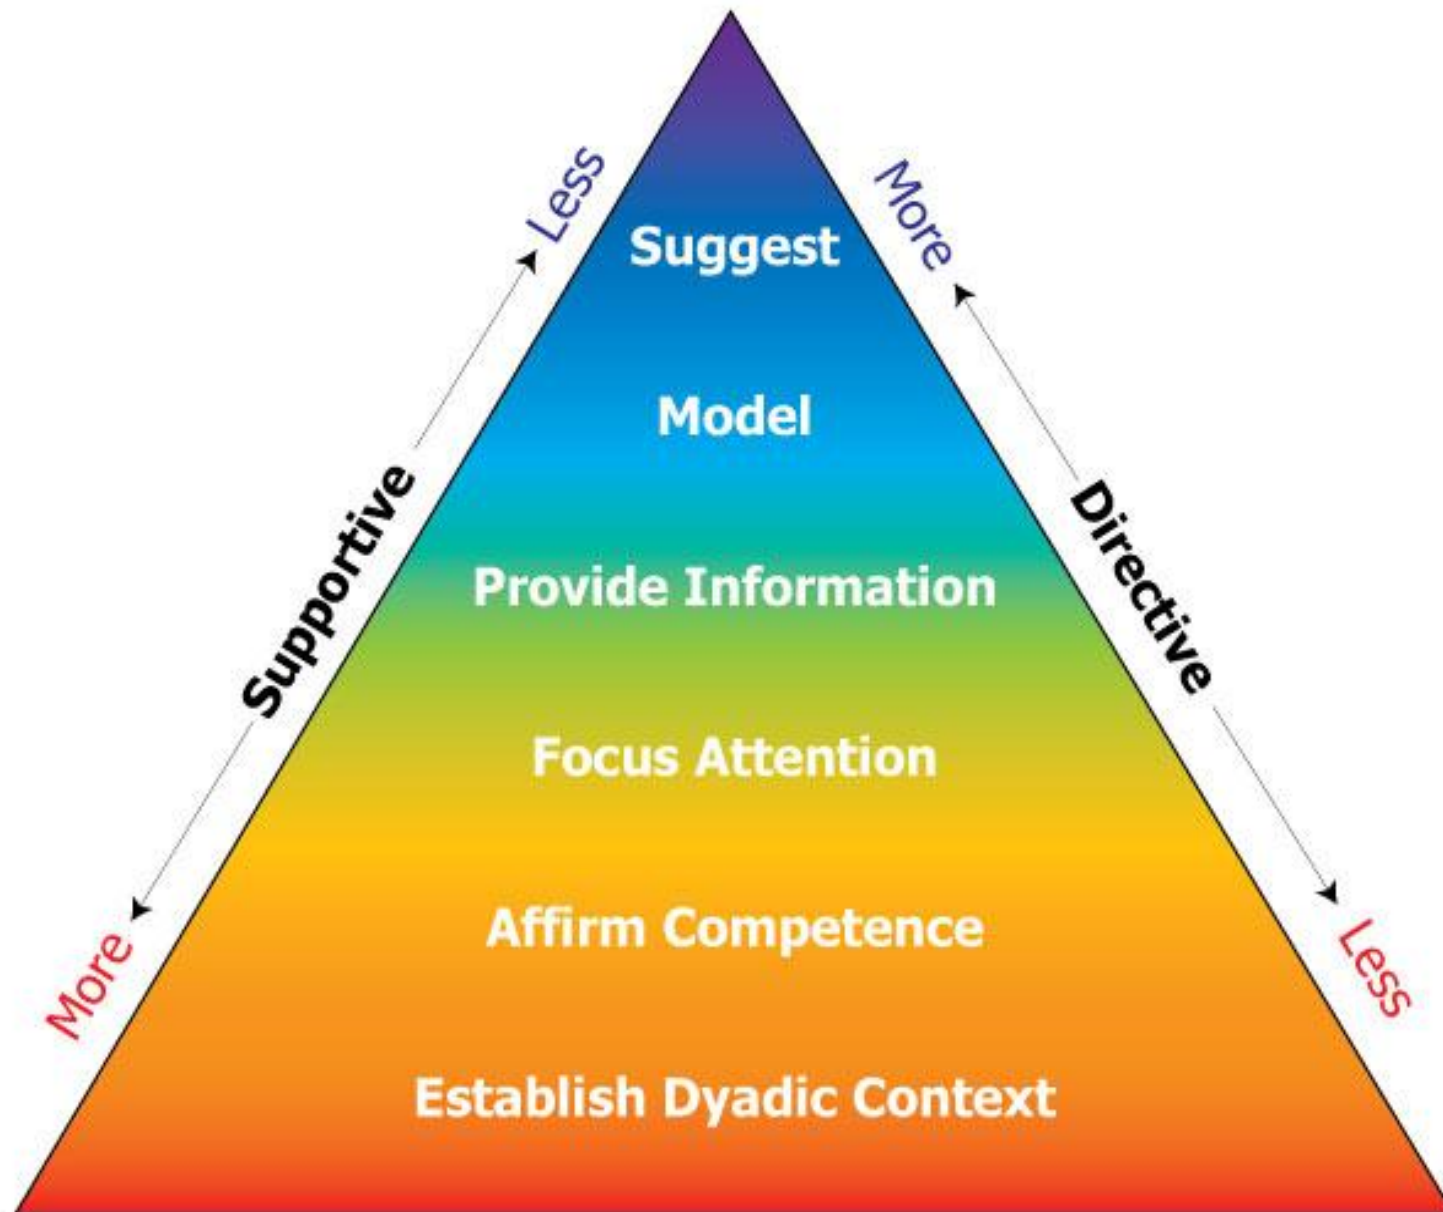

...the one factor best differentiating the more successful intervention efforts was the extent to which the interventions were aimed at supporting and enhancing the roles of families as competent and confident caregivers of their young children.

(Guralnick, 1998)

Triadic Strategies

Least to **Most** Support & Directiveness

In a *Triadic* Home Visit Parent and Professional:

1. **Discuss** an agenda and focus collaboratively
2. **Share** observations and ideas
3. **Focus** on and discuss child's strengths and developmental needs
4. **Prioritize** concerns or needs
5. **Discuss** new learning opportunities (goals)
6. **Observe, Practice, Feedback**
7. **Brainstorm strategies** that can be used between visits (“curriculum of the home”)
8. **Plan** “next steps” and next visit
9. **Follow up** and evaluate how things went

Getting Ready Strategies

- Establish/re-establish relationship with parent
- Asks parent to share observations and ideas
- Affirm parents' competence
- Establish dyadic context
- Help parents discuss and prioritize concerns/ needs
- Focus parent's attention on child strengths
- Provide developmental information
- Brainstorm
- Make suggestions/ provide directives
- Promote practice and interaction/ model

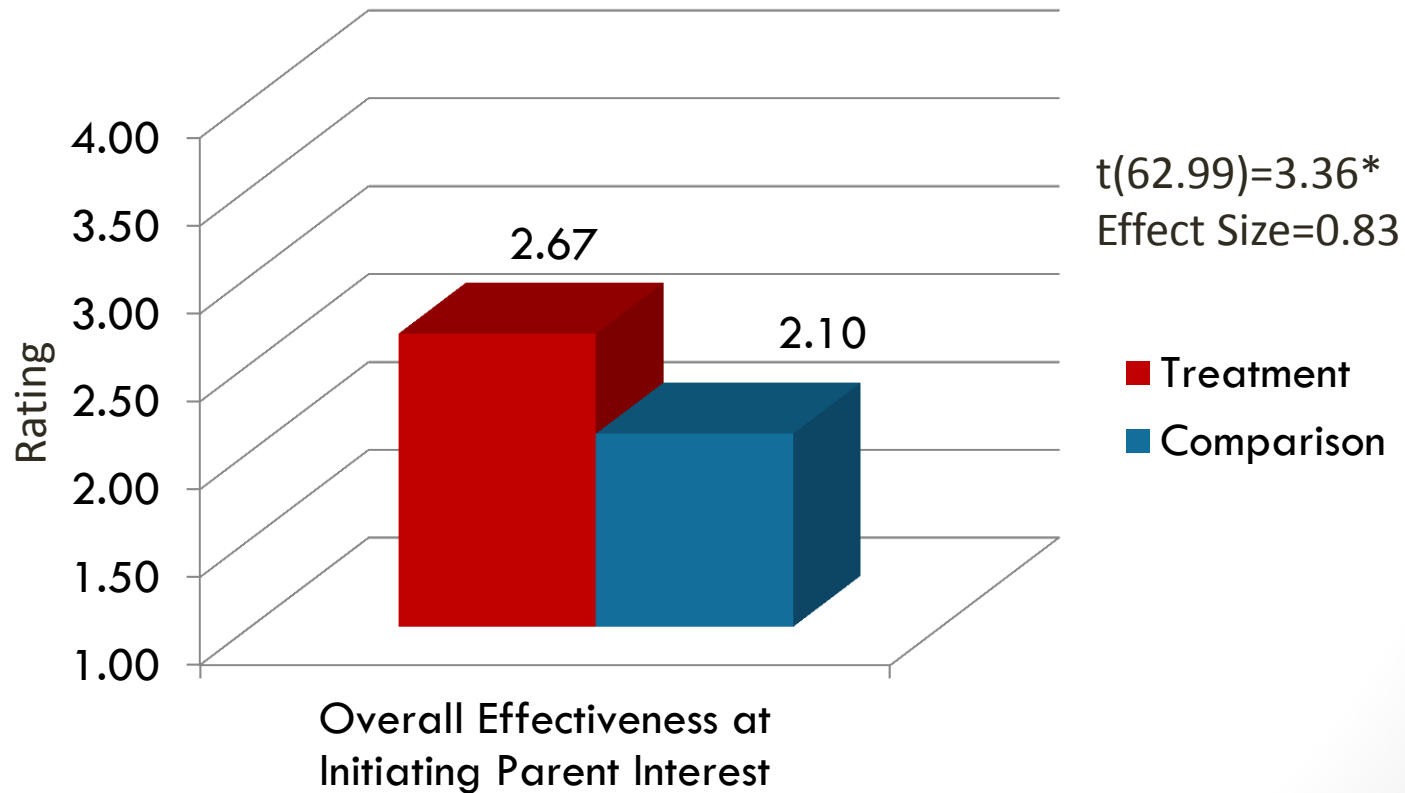

Research on Implementation

Early childhood professionals in the treatment group utilized Getting Ready strategies more than comparison ECPs over the course of a home visit.

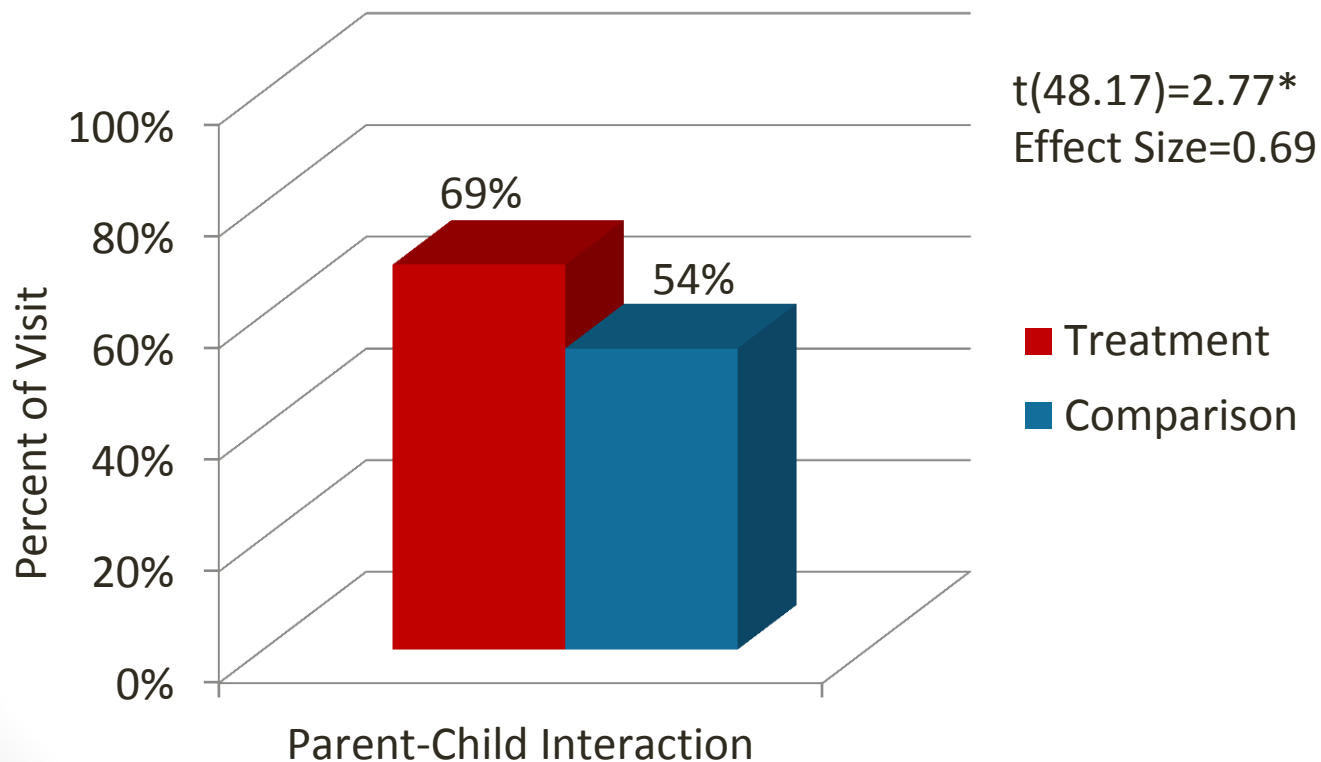

Research on Implementation

Early childhood professionals in the treatment group were rated to be **more effective** at initiating parental interest and engagement during the home visit.

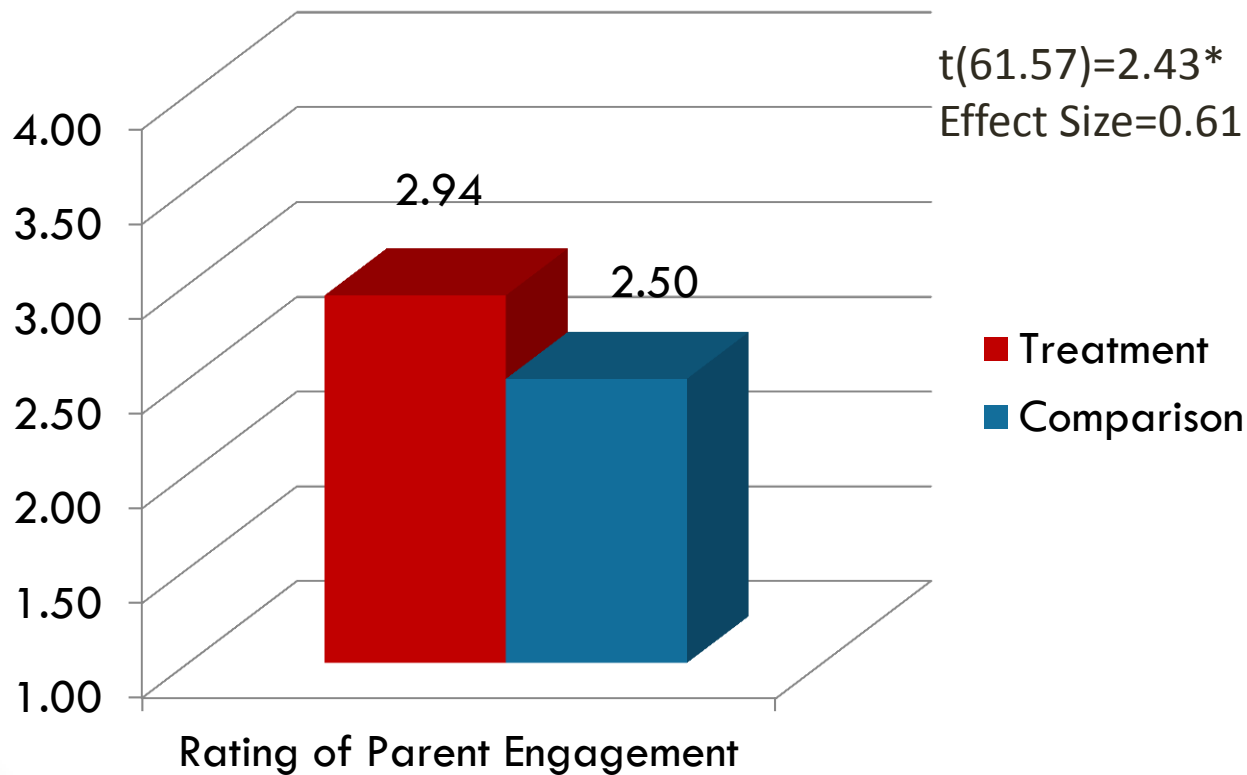

Research on Parents

Parents and children in the treatment group were observed to be interacting with each other more than in the comparison group.

Research on Parents

Ratings of parents engagement with their children were also higher in the treatment group.

Research on Implementation

Strategy use was different by program

Early Head Start

- Establish relationship
- Establish dyadic contexts
- Prioritize concerns
- **Elicit parent observations**
- **Affirm parent competence**
- **Provide developmental information**
- Focus attention
- Brainstorm ideas
- Suggest
- Model/Practice
- Plan future goals

Head Start

- Establish relationship
- **Establish dyadic contexts**
- Prioritize concerns
- Elicit parent observations
- Affirm parent competence
- Provide developmental information
- Focus attention
- **Brainstorm ideas**
- **Suggest**
- Model/Practice
- **Plan future goals**

So What?

Links to Outcomes

Research on Parents (EHS)

Figure 1. Warmth & Sensitivity - Quality

Figure 2. Encouragement of Autonomy - Quality

Figure 3. Support for Learning - Appropriateness

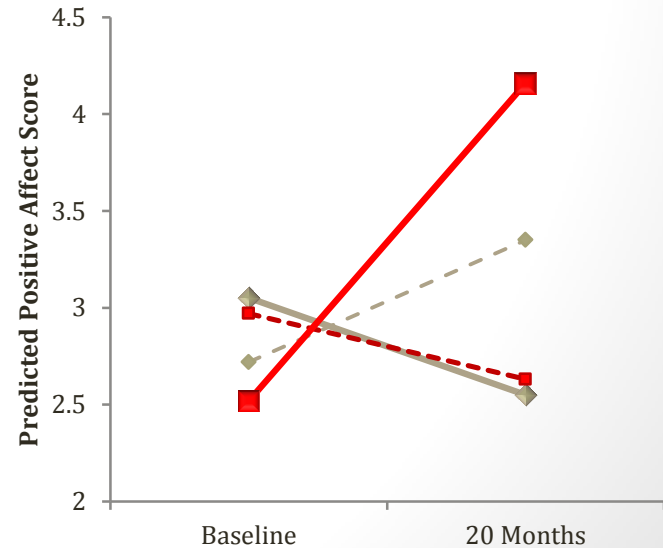

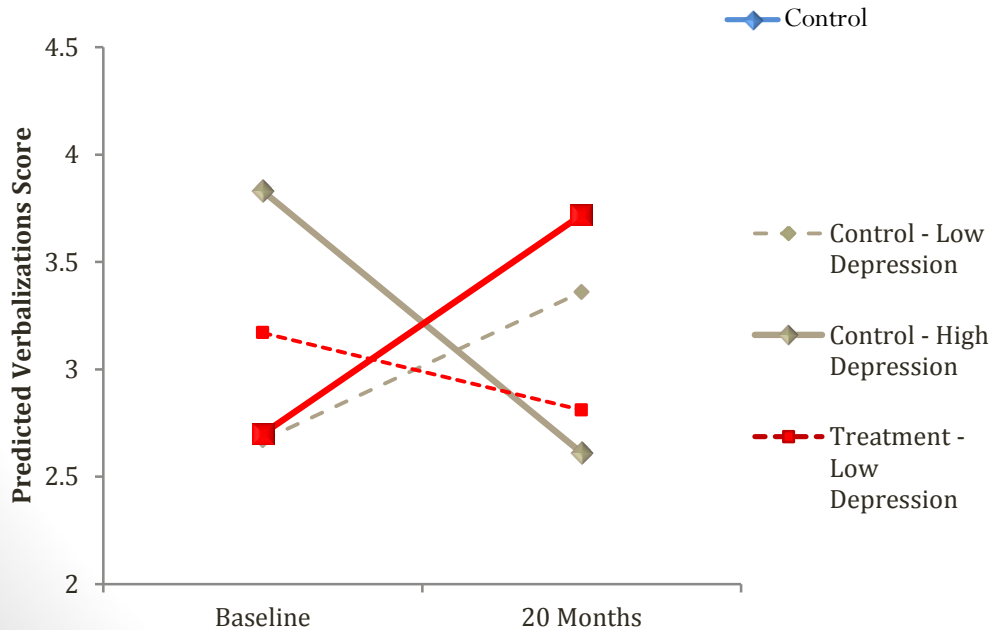

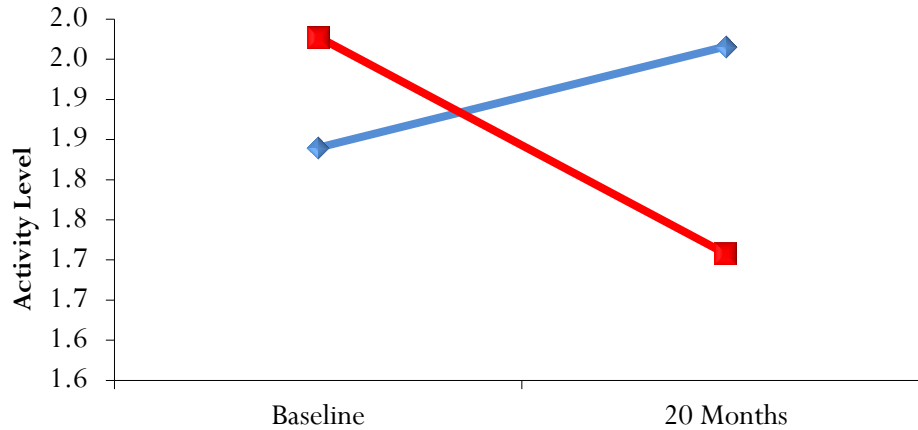

Figure 4. Guidance/Directives - Appropriateness

Research on Children (PreK)

What Does This Suggest?

- Parent-teacher relationships matter
- Parent-child relationships matter
- Effective collaborative partnerships are a philosophical approach and integral to quality programming
